Please amend the present application as follows:

## **Claims**

The following is a copy of Applicant's claims that identifies language being added with underlining ("\_\_\_\_") and language being deleted with strikethrough ("—\_"), as is applicable:

1. (Currently amended) A method for completing forms, comprising the steps of:

receiving location information for reading a user data card to determine a network location at which user information to be added to a form is stored;

retrieving the user information from the network location;

configuring the user information for merging with the form; and

merging the user information into the form by populating form data fields with pieces of the user information; and

printing a <u>hard copy</u> form that contains at least a portion of the user information.

- 2. (Currently amended) The method of claim 1, wherein the location information is received by reading a data card of the user is read by a card reader of a printer that prints the hard copy form such that no separate computer is needed to generate the hard copy form.
- 3. (Original) The method of claim 1, wherein the location information comprises a universal resource locator (URL).

- 4. (Canceled)
- 5. (Currently amended) The method of claim 4, 1, wherein the network comprises the Internet.
  - 6. (Canceled)
- 7. (Currently amended) The method of claim 1, further comprising the step of confirming authorization to access the user information.
- 8. (Currently amended) The method of claim 7, wherein the step of confirming authorization comprises receiving a correct passcode.
- (Currently amended) A system for completing forms, comprising:
   means for receiving reading location information for from a user information
   data card;

means for retrieving the user information from a network location identified in the location information;

means for <del>configuring the user information for</del> merging the user information with a form; and

means for printing a <u>hard copy</u> form that contains at least a portion of the user information.

- 10. (Currently amended) The system of claim 9, wherein the means for receiving location information comprises a card reader of a printing device, the card reader being that is adapted to read data from a the user data card.
- 11. (Original) The system of claim 9, wherein the means for retrieving the user information comprises a network interface device.
- 12. (Original) The system of claim 11, wherein the network interface device is adapted to transmit and receive data via the Internet.
- 13. (Currently amended) The system of claim 9, wherein the means for printing a hard copy form comprises a printer.
- 14. (Currently amended) A printing device, comprising:
  printing hardware with which hard\_copy documents can be generated;
  a card reader that is adapted to read data location information from a user data
  card;
- a network interface device that is adapted to transmit and receive data via a network retrieve user information from a network location identified in the location information; and

device memory that stores forms data; and

a form generation module that merges the user information with a form stored in the device memory for the purpose of printing a hard copy form that is at least partially completed.

15. (Original) The printing device of claim 14, wherein the card reader is adapted to read information from a magnetic strip of the user data card.

## 16. (Canceled)

- 17. (Original) The printing device of claim 14, further comprising a network browser.
- 18. (Original) The printing device of claim 17, wherein the network browser is an Internet browser.
- 19. (Original) The printing device of claim 14, wherein the printing device comprises a printer.
- 20. (Original) The printing device of claim 14, wherein the printing device comprises a multifunction peripheral (MFP) device.
